

COMPOSITE ENGINEERING CONSULTANCY

Concept Design

Our naval architects are familiar with composite construction methods and can create a new design suitable for composite manufacturing.

Composite Tooling

Using the latest CNC technology a new design can have plugs or moulds made quickly and precisely from laser cut parts.

Composite Engineering

With experience in the design of large composite motor yachts we can provide composite designs that will satisfy any of the major international classification standards.

Manufacturing Systems

Whether it is traditional hand lamination production or one of the latest resin infusion processes we can advise on the most appropriate manufacturing method for your project.
